Title of Work	Fixpert App - Connecting skills
Nature of Work	A search app where individuals or companies can look for other individuals or companies that can offer services they are looking for and within the same geographical area.
Year in which work was created	2020
Country in which work was created	Ghana
Description	<p>Design a web app to enable individual skilled workers, handymen, SME's or Companies to post their skill set so that individuals or Companies who are looking for people with specific skills can use the app to find those persons/companies that can offer those services and who are located within the same geographical area.</p> <p>So for example if I need a plumber to fix a pipe leakage in my house, I can open the app and search for plumbers within my area. However, if I need a small carpentry shop to do a project in my backyard, I can then look in the SME section of the app for a small business or shop that can offer that service. However, if I am a big Company that is looking for another big Company to provide a certain service, then I can go to the Company section of the app and look for a Company within the closest geographical area to me that can offer that service.</p>
